He and his wife Maria have nine living (on Earth) children and sixteen grandchildren (so far), including two daughters who are members of a Benedictine Abbey. Hugh is a professional writer, editor, and director of the Kolbe Center for the Study of Creation, which provides a forum for Catholic theologians, philosophers, and natural scientists all over the world who defend the traditional Catholic doctrine of creation and who expose the fatal flaws in the molecules-to-man evolutionary hypothesis in both its theistic and atheistic forms. Author of "Vaccination, A Catholic Perspective", a history of vaccination with a comprehensive introduction to the marvels of the divinely-designed human immune system.
