**Contraception is dangerous to your health! Read
FDA patient information warnings on packaging
Contraception = Abortion! Facts from ALL.org:
Contraception separates husband from wife, and couple
from God.** Most contraceptives are drugs or devices that can
cause early abortion. Condoms and the “safe sex” lie results in
widespread STD’s, emotional trauma, and immoral sex.

Contraceptives are not safe for mother or child according to
the patient information package and various studies.
Guttmacher Institute reports as many as 70,000,000 since R v
W 1973, but they *exclude* in vitro abortions, “medical
research” abortions, “emergency contraceptive” abortions, and
they *exclude all* abortions from “the pill” and contraceptives:
‘the birth control pill’ allow fertilization to occur 2-10% of
the time. They cause the lining of the uterus to become
inhospitable to the newly conceived who literally dies from
lack of nourishment and is aborted, unable to implant.

IUDs work by interfering with the enzymatic processes of the
developing baby and by inflaming the lining of the uterus,
making it inhospitable to implantation, also abortifacient.

Norplant consists of six-one inch long silastic rods implanted
in the arm and contains the progestin, *levonorgestrel*, which
acts for 5 years. There are approx. 1,500,000 users. At a 50-
65% ovulation rate times a 25% conception rate, amounting
to over *one million of these chemical abortions per year*.

Depo-Provera similarly, is injected under the skin every 3
months. Based on an estimated 1 million users and an
ovulation rate of 40- 60%, it has been determined that at the
lower rate there are 400,000 ovulatory cycles, times a 25%
conception rate yielding about *100,000 chemical abortions
per cycle or 1,200,000 per year. Who counts these lives?*

Abortion Pill used before ten weeks, RU 486 is a chemical
compound taken in pill form, can induce abortion in women
up to nine weeks pregnant; involves two drugs and three trips
to the doctor's office over a two week period. Surgical
abortions follow 4-5% failure rate. Prescribed pill-induced
abortions exceed surgical abortions and are ten times more
likely to cause death, plus disabilities. *Many side effects!*

The “morning after pill”, “plan B” or “Ella” has *over one
billion in annual sales*. Pills are extremely hazardous to
women’s health, and especially to minor children!

Breast Cancer and Abortion, many chemical side effects!
*In the U.S., women under age 45 who have had abortions may
have a 50% higher risk of breast cancer*, according to a study
reported in the Journal of the National Cancer Inst. The risk is
more than doubled for women under 18 who have abortions.

Stop Planned Parenthood, www.stopp.org PP Federation of
America earns over two billion per year selling birth control
products, creates a demand via the sex ed it promotes in
schools. As promiscuity rises, so also the number of
unintended pregnancies due to contraceptive failure. PP profits
from contraception= abortion = death for the conceived child!
Myths: “safe sex”, “contraception stops ovulation”-not always!
